

TURNKEY SOLUTIONS

We offer an out of the box system with brand customization for a very attractive monthly payment. All you need is a web browser.

HOSTED OR ON-SITE

All of our solutions are developed for the web so we can offer the options of local server installation or we will host your application for an attractive monthly fee in our data centre.

APPLICATION PROVIDER

For smaller dealerships that only require a few users we have a hosted version of our application. We offer partitioned data for each licensed organization so all you need is a username and password and you can begin using the system.

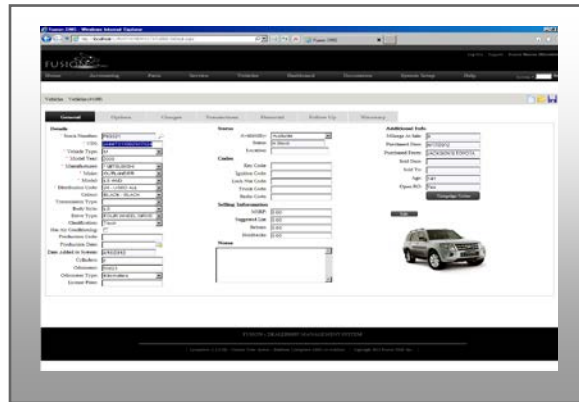

DATA MIGRATION

Our migration team has been in the DMS space for over a decade with extensive experience migrating data from all of the major DMS vendors.

Additional Features

OPERATIONAL SUPPORT

Our operational support experts have been solving dealership issues for over a decade and are former service managers and dealership controllers.

CUSTOMIZATION

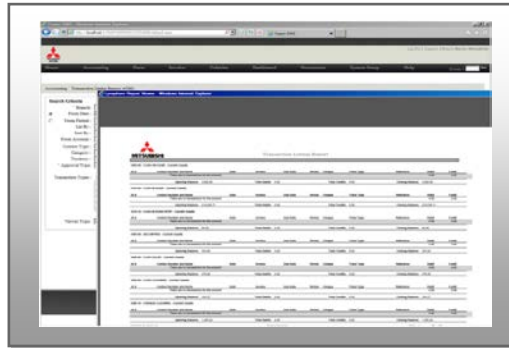

Our system was developed with cutting edge web technologies which enables scalability and deep application customization as required.

TECHNICAL SUPPORT

We offer M-F 9-7 EST customer technical support.

For more information on any of our products or services please visit us on the Web at:

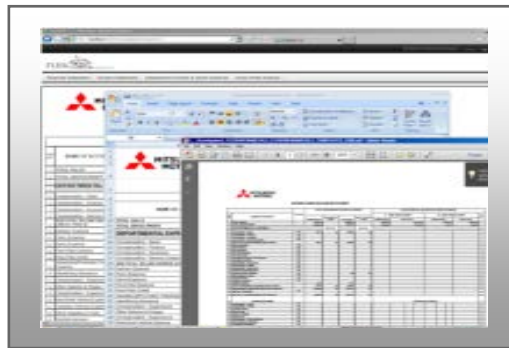

www.fusiondms.com

ENHANCED REPORTING

Fusion DMS has over 60 financial and operational reports which provide a wide breadth of daily operational understanding with options for historical comparison.

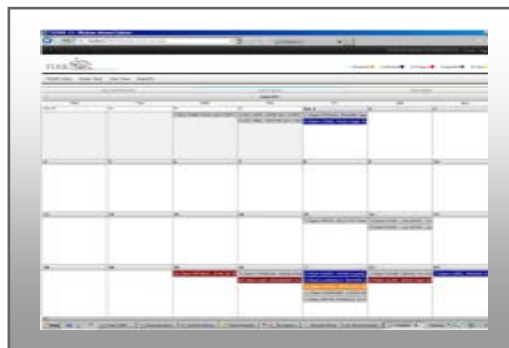

Reports rendered and exported in MS Word, Excel and PDF.

FUSION FINANCIALS

Our financial statements module incorporates OEM specific financial statement formats and populates with date driven results.

Populated statements can be viewed within the application or exported to MS Excel and Adobe PDF.

SHOP SCHEDULER

Our service appointment manager is fully integrated with our DMS offering which allows appointment creation and technician provisioning as well as RO creation complete with job pricing lines and operation codes.
